

Modus: TUP Video Pitch 2.0 (The "Sejal" Story Arc)

This structure takes your 10 brainstormed points and reorganizes them into a highly persuasive, emotionally resonant 3-minute pitch.

By starting with the human element (Sejal) and backing it up immediately with hard data (Thematic Analysis / Surveys), you prove both the *heart* and the *brain* of the business before showing the prototype.

Total Runtime: ~3 Minutes

0:00 - 0:40 | The Hook: India's Unorganized Market & The "Sejal" Story

(Maps to your points: 2, 4, and Indian Specific Needs)

- **Visuals:** Fast montage of the Indian digital revolution (cheap internet, smartphone adoption). Then, focus on a specific, relatable face: "Sejal," a talented creator from a Tier-2 city shooting a video in her small room.
- **On-Screen Text (GFX):** The Jio Revolution. 4M+ Creators. But who is actually winning?
- **Audio/Script:** "Cheap internet gave millions of Indians the medium to achieve their dreams. Meet Sejal. She has 50,000 engaged followers in Jaipur. But in India's highly unorganized creator market, talent doesn't equal opportunity. The industry is plagued by metro-bias and nepotism. There is simply no structured space for regional influencers to showcase their talent and get a fair chance at discovery."

0:40 - 1:10 | The Proof: Survey Results & Thematic Analysis

(Maps to your points: 3, 8, 9, and Survey/Thematic Analysis)

- **Visuals:** A dramatic shift to data visualization. Show a "Survey Results" graphic scanning through 100+ creator profiles. Show a word cloud/Thematic Analysis highlighting the biggest pain points. Show a graphic of a "Personal Manager" taking a massive 30% cut.
- **On-Screen Text (GFX):** Thematic Analysis of 100+ Micro-Influencers: 1. Payment Fraud. 2. Manager Bias. 3. Missed Deals.
- **Audio/Script:** "We didn't just assume this. We surveyed over 100 micro-influencers and ran a thematic analysis on their feedback. The results were clear: Creators are losing deals they deserve. When they do get deals, they face severe payment delays and controversies. And the traditional 'Personal Manager' model? It's biased, wildly expensive, and ignores micro-creators entirely. The system is broken."

1:10 - 1:50 | The Solution: Unveiling the Modus Walkthrough

(Maps to your points: 1, 5, Platform Users, Use Cases)

- **Visuals:** The chaotic data gets sucked away, replaced by the clean, sleek UI of the Modus Prototype. Do a fast-paced screen recording walkthrough. Show the Brand logging in, finding Sejal, and funding the Escrow.
- **On-Screen Text (GFX):** Modus: The Fair-Chance Platform. Use Cases: Brand Discovery & Creator Escrow.
- **Audio/Script:** "Enter Modus. We are unveiling the first truly organized ecosystem for India's creators. Let's walk through it. A D2C brand searches for a regional lifestyle creator and finds Sejal instantly based on real data, not agency bias. Modus handles the matchmaking, auto-generates the legal

contract, and most importantly, secures the funds in Escrow before Sejal even starts filming. Fair talent meets fair payment."

1:50 - 2:20 | Competitor Landscape: Why We Win

(Maps to your point: 6)

- **Visuals:** Split screen. On the left, Instagram's Creator Marketplace (clunky, endless scrolling, no payment integration). On the right, Modus (clean, compliance-focused, integrated payments).
- **On-Screen Text (GFX):** Instagram = Directory. Modus = Transaction Engine.
- **Audio/Script:** "You might ask, what about the Instagram Creator Marketplace? Instagram built a directory; we built a transaction engine. Instagram doesn't handle your ASCI compliance, it doesn't auto-generate your 194R TDS tax certificates, and it certainly doesn't guarantee your payment through escrow. Our design is built for end-to-end convenience and guaranteed results, something a social network can never offer."

2:20 - 3:00 | Financials & The Ultimate Proposition

(Maps to your points: 7, 10)

- **Visuals:** Slick 3D animation of the revenue streams building up like blocks. Show a pie chart of SaaS, Escrow Fees, and Add-ons. Finish with a powerful shot of Sejal smiling, holding her first official payment certificate.
- **On-Screen Text (GFX):** SaaS + 5% Escrow Fee. Fair Payment. Fair Talent.
- **Audio/Script:** "Our proposition is simple: Fair payment, fair talent. And it's powered by a highly scalable financial model. We monetize the brands through SaaS subscriptions, a 5% escrow transaction fee, and compliance add-ons, ensuring it is always free for creators."

We are organizing the unorganized. We are giving Sejal, and millions like her, the platform they deserve. We are Modus. Thank you."
