

MODUS: TUP 3-Minute Video Pitch — Master Production Storyboard

Editing Style & Vibe: Think "Johnny Harris" meets "Apple Product Launch." Fast, kinetic typography, intense sound design, 3D camera tracking on UI screens, and extreme contrast between the "chaos" of the problem and the "cleanliness" of the Modus solution.

Color Palette: Gritty, desaturated tones for the "problem" sections. Bright, glowing neon accents (Modus brand colors) for the "solution" sections.

ACT 1: The Paradox (0:00 - 0:45)

Editing vibe: Fast-paced, overwhelming, culminating in a heavy drop.

Time	Visual / Video Action (The "Crazy Edit")	Audio (SFX & Music)	Dialogue (Speaker)	On-Screen Text (GFX)
0:00-0:04	Fast Montage: 4-5 quick cuts of polished Mumbai influencers in luxury cafes. <i>Edit:</i> Fast zoom transitions with light leaks.	<i>Music:</i> Upbeat pop, muffled. <i>SFX:</i> Camera shutters flashing rapidly.	"India's creator economy looks like this."	(None)
0:04-0:08	Hard Cut: The music violently stops. Show raw smartphone footage of a rural creator in a field. <i>Edit:</i> Slow zoom in. Color shifts to warm, grounded tones.	<i>SFX:</i> Loud vinyl scratch. Instant silence. Wind blowing.	"But the reality... looks like this."	(None)

Time	Visual / Video Action (The "Crazy Edit")	Audio (SFX & Music)	Dialogue (Speaker)	On-Screen Text (GFX)
0:08-0:15	Kinetic Typography: Speaker stands in a dark studio. As they say the numbers, massive 3D text slams into the space next to them, shaking the camera.	<i>SFX:</i> Deep cinematic bass drops (BWOOSH) as each number hits.	"Of India's 4.12 million digital creators, 66% live outside the metros."	4.12 MILLION 66% NON- METRO
0:15-0:22	Visual Hook: The screen cracks like glass. <i>Edit:</i> Glitch transition to a shocking statistic taking up the whole screen in red.	<i>SFX:</i> Glass shatter. High-tension riser starts building.	"Yet, despite driving 60% of all YouTube watch time... 85% of them earn absolutely zero."	85% EARN ZERO.
0:22-0:35	UI Chaos Sequence: Screen is flooded with overlapping WhatsApp chats. Texts like "Paise kab milenge?" bounce around. <i>Edit:</i> The chats get stamped with giant red warning labels using aggressive tracking.	<i>SFX:</i> Non-stop iPhone notification pings overlapping into a chaotic noise. Loud red stamp sounds.	"Why? Because brands are terrified. Unverified creators, 98% ASCI violations, and the nightmare of 194R TDS tax audits."	ASCI VIOLATION 194R TAX AUDIT FAKE ESCROW
0:35-0:45	The Void Transition: The chaotic WhatsApp screens get sucked into a black hole in the center of the screen. <i>Edit:</i> Reverse explosion, everything goes dark and silent.	<i>SFX:</i> Reverse vacuum sweep (swoosh), leading into total silence for 1 second.	"Discovery isn't the problem. Trust and compliance is."	(Blank Screen)

ACT 2: The Solution (0:45 - 1:30)

Editing vibe: Ultra-clean, smooth, high-tech, satisfying.

Time	Visual / Video Action (The "Crazy Edit")	Audio (SFX & Music)	Dialogue (Speaker)	On-Screen Text (GFX)
0:45-0:55	The Reveal: Out of the darkness, a glowing 3D render of the Modus Dashboard emerges. <i>Edit:</i> Smooth orbit camera pan around the UI. Glassmorphism UI elements floating in 3D space.	<i>Music:</i> Modern, pulsing synthwave begins. <i>SFX:</i> Clean digital power-up chime.	"Enter Modus. The Trust and Compliance operating system for Bharat's creator economy."	MODUS 2.0 Compliance OS
0:55-1:05	The Brand Side (Left Screen): Split screen. Show a brand uploading a brief. AI scans it. <i>Edit:</i> A glowing green line sweeps down the brief, replacing red errors with green checkmarks.	<i>SFX:</i> Fast futuristic typing, success "ding".	"For brands, we automate the legal nightmare. Our AI auto-corrects ASCI disclosures before content goes live."	✓ ASCI Compliant
1:05-1:15	The Creator Side (Right Screen): Show a Razorpay escrow lock icon securing funds. Then, a beautiful PDF tax certificate generates instantly. <i>Edit:</i> Isometric 3D view of the PDF popping out of the screen.	<i>SFX:</i> Heavy vault locking sound. Cash register "cha-ching".	"And we auto-generate 194R TDS and GST certificates. For creators, it means Razorpay-secured escrow. They know the money is safe before they shoot."	 Funds in Escrow  194R TDS Generated
1:15-1:30	The Contrast: Quick swipe transition showing the "Old Way" (Excel sheet) vs "Modus Way" (Clean Dashboard). <i>Edit:</i> Whip pan transition.	<i>SFX:</i> Whip whoosh.	"No CA. No agency markup. No WhatsApp nightmare."	No Agency. No WhatsApp.

ACT 3: The Business Engine (1:30 - 2:20)

Editing vibe: Aggressive data presentation. Make the numbers look massive and undeniable.

Time	Visual / Video Action (The "Crazy Edit")	Audio (SFX & Music)	Dialogue (Speaker)	On-Screen Text (GFX)
1:30-1:45	Revenue Build-up: Speaker walking towards camera. Behind them, 3 glowing pillars rise from the ground forming a bar chart. <i>Edit:</i> Motion tracking the graphics to the environment.	<i>SFX:</i> Heavy stone grinding sounds as pillars rise.	"We are driven by a cause, but powered by a ruthless business model. We monetize demand: SaaS subscriptions, a 5% Escrow fee, and compliance add-ons."	₹4,999 SaaS 5% Escrow Fee 2% EWA (Year 2)
1:45-1:55	The Hero Metrics: Close up on speaker's face. The numbers reflect in their glasses or float directly in front of their eyes. <i>Edit:</i> Cyberpunk HUD style overlays.	<i>SFX:</i> High-tech telemetry beeps. Level-up sound effect.	"Because we automate the heavy lifting, our Year 1 LTV to CAC ratio is an absurd 22.5x."	LTV : CAC = 22.5x
1:55-2:05	Breakeven Graphic: A progress bar fills up instantly, hitting a marker. <i>Edit:</i> Screen shakes slightly when it hits breakeven.	<i>SFX:</i> Heavy impact thud.	"We hit operational break-even at just 133 paying brands in Month 16."	BREAKEVEN: M16 (133 Brands)
2:05-2:20	The Moat: A massive vault door slams shut on a stack of digital papers (TDS/Audit files). <i>Edit:</i> Spark particle effects as the vault locks.	<i>SFX:</i> Massive metallic slam and lock mechanism. Sub-bass rumble.	"Our moat is bulletproof. Once a brand runs campaigns on Modus, their entire audit history lives here. The switching cost becomes regulatory risk."	THE COMPLIANCE MOAT

ACT 4: The Jio Ethos & The Ask (2:20 - 3:00)

Editing vibe: Cinematic, inspiring, massive scale. Slowing the pace down for emotional impact.

Time	Visual / Video Action (The "Crazy Edit")	Audio (SFX & Music)	Dialogue (Speaker)	On-Screen Text (GFX)
2:20-2:35	The Map: A dark map of India. Instead of Mumbai/Delhi lighting up, thousands of glowing dots explode across UP, Bihar, Rajasthan, and Maharashtra. <i>Edit:</i> Data-visualization style network glowing.	<i>Music:</i> The beat drops out. Replaced by a soaring, cinematic string swell. <i>SFX:</i> Soft electrical hum.	"Competitors are fighting a bloodbath for the top 1% in Mumbai. Modus is building the infrastructure for the other 99% in Bharat."	(Map Visual Only)
2:35-2:45	The Impact: Show a montage of 3 regional creators looking proudly at their phones, holding a formal "Modus Verified" digital certificate. <i>Edit:</i> Smooth crossfades, 24fps cinematic look.	<i>SFX:</i> Heartbeat sound playing underneath the music.	"We project ₹18 Crores in Year 3 revenue, but our true North Star is the Economic Citizenship Index..."	Economic Citizenship Index
2:45-2:55	The Look: Close up of speaker, dead center frame. Looking directly into the lens. No graphics. No distractions. <i>Edit:</i> Slow push-in on the face.	<i>Music:</i> Cuts out completely at "financially real." Total silence.	"...bringing millions of invisible creators into the formal economy. We don't just help brands find creators..."	(None)
2:55-3:00	The Drop / Outro: The Modus logo slams onto a black screen. <i>Edit:</i> Chromatic aberration glitch on the logo.	<i>SFX:</i> Heavy bass drop. Deep cinematic boom.	"...we make creators financially real. Thank you."	MODUS Make It Real.

Production Requirements for the Editor

1. **Pacing:** Cut on the beat. The first 45 seconds should have a cut or visual change every 2-3 seconds to hold the TikTok-era attention span.
2. **Assets needed:**
3. Figma UI files of Modus (to animate the dashboard in After Effects/Blender)
4. Stock footage of generic influencers vs high-quality stock of rural/tier-2 farmers/cooks shooting videos.
5. Screen recordings of chaotic WhatsApp groups.

6. **Typography:** Use a bold, wide sans-serif font (like *Clash Display*, *Monument Extended*, or *Inter Black*). Always use tracking/glow effects on text.
7. **SFX Library:** Use deep risers, hits, whooshes, and UI clicks (e.g., from Epidemic Sound or Artlist). The sound design is 50% of the "crazy edit" feel.
